Wednesdays, 9:00 to 10:00

Dues: \$2.00 per year

Weekly presentations that are mind-expanding, informative and challenging

12/1/2021 The Science of Armageddon – Don Berk

Recent geological, archaeological and spacecraft-captured evidence indicate that the sun undergoes a "nova" periodically, subjecting Earth to a bombardment of plasma (CME, or Coronal Mass Ejection) and cosmic rays. Near-existential flareups appear to occur in 12,000-year cycles; lesser eruptions occur more often but can be devastating. The "supernatural" destructive events described in Bible have all the characteristic of what our ancestors would have experienced during a solar nova.

12/8/2021 Secular Christmas Music Part III – Alan Kruse

This presentation will feature secular popular Christmas music from the 50s. We'll start with "Frosty the Snowman" (1950) and include "It's Beginning to Look a Lot Like Christmas," "Silver Bells," "Santa Baby," "Blue Christmas," "Jingle Bell Rock," "Little Drummer boy," and "Rockin' Around the Christmas Tree." We won't skip such novelty classics as "I Want a Hippopotamus for Christmas." We'll also look at some of the more colorful picture sleeves and album covers.

12/15/2021 New Ways to Spread the News – Dan Shearer

The print newspaper will always be the core, but the Green Valley News is using other media and methods to get out what's happening around town.

12/22/2021 Hohokam Art - Mary Jo McMullen

The Hohokam are known for two things – their farming skills and their skills with arts and crafts. This talk explores their beautiful artwork in pottery, jewelry, stoneware, and shell artwork.

12/29/2021 No Forum Club – Enjoy the Holidays
